Technical Notebooks n  60

This publication was made possible thanks to the support provided by the **Fundaci n Internacional y para Iberoam rica de Administraci n y Pol ticas P blicas - FIIAPP** (the International Foundation and for Iberoamerica on Administration and Public Policies) a public foundation serving as an instrument of the Spanish Government in the field of international cooperation and, more specifically, targeting the political, legislative and administrative strengthening of countries which are beneficiaries of international aid.

The FIIAPP and the **Fundaci n Secretariado Gitano (FSG)** have been close collaborators over the last two years and, based on that experience, have signed a Collaboration Agreement serving as the framework for this publication.
